RSACT-01F.3		Dashboard Status: NA
		Notification & Alerts (IN): NA
RSACT-01G	<p>Risk Priority:</p> <p>ADD Risk Priority:</p> <ul style="list-style-type: none"> Risk Priority Name [Text Field; VarChar – 25Chrs; Unique; Mandatory]: The Super Admin will need to enter the Risk Priority Name. Certain 'default values' need to be input by User Role: Implementor. <i>[Limit on number of Risk Priority Names need to be configured by Administrator (value should not be less than 3 and greater than 10)]</i> [Validation: 1) The order needs to be set from highest score position to lowest. For eg, if No. 1 is top position, then numbers in increasing order will have lower scores allotted.] Set Rating Level Range [Number Field; Value Range – Min 1 to Max 100; Unique; Mandatory; color selection with hex codes]: The Super Admin will need to enter range of numbers against each Risk Priority Name. Certain 'default values' need to be input by User Role: Implementor. Further, select a Color from pre-defined color palette to signify the rating scale selected. [Validation: 1) The number range can lie between 1 to 100 only, 2) Once the range has been set, no other number can be used if it falls between the numbers set earlier]. For example, for Rating Level 'Critical Risk' the range may be set between 16 and 25 [Red]. Similarly, for Rating Level 'Medium Risk' the range may be set between 6 and 15 [Yellow]. Thus, for Score Indicator 'Low Risk' number range between 5 and 10 will not be allowed, as 10 already falls in between the range used by 'Medium Risk' indicator, hence the number to set has to be less than 6 [Green]. Risk Priority Description [Text Field; VarChar – 150Chrs; Optional]: The Super Admin may enter description for Risk Priority. Final Input Form may look like this: 	User Role: Super Admin
		Status Tracking: NA
RSACT-01G.1		Action Task Board: NA

RSACT-01M.1	<p><u>ADD Risk Intensity Rating Level:</u></p> <ul style="list-style-type: none"> – Risk Intensity Level Name [Text Field; Unique; VarChar – 25Chrs; Mandatory]: The Super Admin will need to enter the Risk Intensity Rating Level Name. <i>[Limit on number of Risk Intensity Rating Level Names need to be configured by Administrator (value should not be less than 3 and greater than 10)]</i> <i>[Validation: 1) The order needs to be set from highest score position to lowest. For eg, if No. 1 is top position, then numbers in increasing order will have lower scores allotted.]</i> – Set Evaluation Level Range [Number Field; Value Range – Min 1 to Max 25; Unique; Mandatory; color selection with hex codes]: The Super Admin will need to enter range of numbers against each Risk Intensity Rating Level Name. Further, select a Color from pre-defined color palette to signify the rating scale selected. <i>[Validation: 1) The number range can lie between 1 to 25 only, 2) Once the range has been set, no other number can be used if it falls between the numbers set earlier]</i>. For example, for Evaluation Level 'High Risk' the range may be set between 16 and 25. Similarly, for Evaluation Level 'Medium Risk' the range may be set between 5 and 15. Thus, for Score Indicator 'Low Risk' number range between 1 and 10 will not be allowed, as 10 already falls in between the range used by 'Medium Risk' indicator, hence the number to set has to be less than 5. – Risk Intensity Rating Level Description [Text Field; VarChar – 500Chrs; Optional]: The Super Admin may enter description for Risk Intensity Rating Level. – Final Input Form may look like this:  <p><u>EDIT Risk Intensity Rating Level:</u></p> <ul style="list-style-type: none"> – Search and Select Risk Intensity Rating Level Name from the 'List of Risk Intensity Rating Level' that needs to be edited. – Edit Risk Intensity Rating Level Name or Evaluation Level Range or Description and UPDATE with changes. – Any change in Risk Intensity Rating Level field(s) does not affect any previous Assessments concluded. RSACT-03A RSACT-03A.1	<p>BP Maturity Rating Scale Indicators:</p> <p><u>ADD BP Maturity Rating Scale Indicators:</u></p> <ul style="list-style-type: none">BP Maturity Rating Name [Text Field; VarChar – 50Chrs; Unique; Mandatory]: The Super Admin will need to enter the BP Maturity Rating Name. Certain ‘default values’ need to be input by User Role: Implementor. [<i>Limit on number of score indicators need to be configured by Administrator (value should not be less than 3 and greater than 5)</i>] [<i>Validation: 1) The order needs to be set from highest score position to lowest. For eg, if No. 1 is top position, then numbers in increasing order will have lower scores allotted.</i>]Set Scale Indicators Range [Number Field; Unique; Mandatory]: The Super Admin will need to enter range of numbers against each Scale Indicator. Certain ‘default values’ need to be input by User Role: Implementor. [<i>Validation: 1) The number range can lie between 1 to 10 only, 2) Once the range has been set, no other number can be used if it falls between the numbers set earlier</i>]. For example, for Scale Indicator ‘Highly Matured’, the range may be set between 8 and 10. Similarly, for Scale Indicator ‘Progressive’, the range may be set between 5 and 7. Thus, for Scale Indicator ‘Need More Improvement’ number range between 1 and 6 will not be allowed, as 6 already falls in between the range used by ‘Progressive’ score indicator, hence the number to set has to be less than 5.Scale Indicator Description [Text Field; VarChar – 150Chrs; Optional]: The Super Admin may enter description for Scale Indicator.Final Input Form may look like this:	<p>User Role: Super Admin</p> <p>Status Tracking: NA</p> <p>Action Task Board: NA</p> <p>Report/ Audit Log: NA</p> <p>Dashboard Status: NA</p> <p>Notification & Alerts (IN): NA</p> <p>Notification & Alerts (OUT): NA</p>
